

8 (short)

(a) Sketch and explain the response of a dashpot to a step in strain (relaxation response) and a step in stress (creep response). [2]

(b) Indicate which of the curves on Fig. 8 (labelled by the letters a to l) corresponds to:

(i) the relaxation response of model 1; [2]

(ii) the creep response of model 1; [2]

(iii) the relaxation response of model 2; [2]

(iv) the creep response of model 2. [2]
